# What is Staking Coins?

---

Staking is the process of purchasing and holding cryptocurrency in your wallet in order to profit from it. The main advantages of coin staking are passive income generation and low entry. Staking can be simple and easy if you use a staking pool or an online service. It is also much less energy-intensive than mining and much less risky than trading. Staking coins is risk-free because you only lease your coins to the validator while maintaining full control and ownership over them.

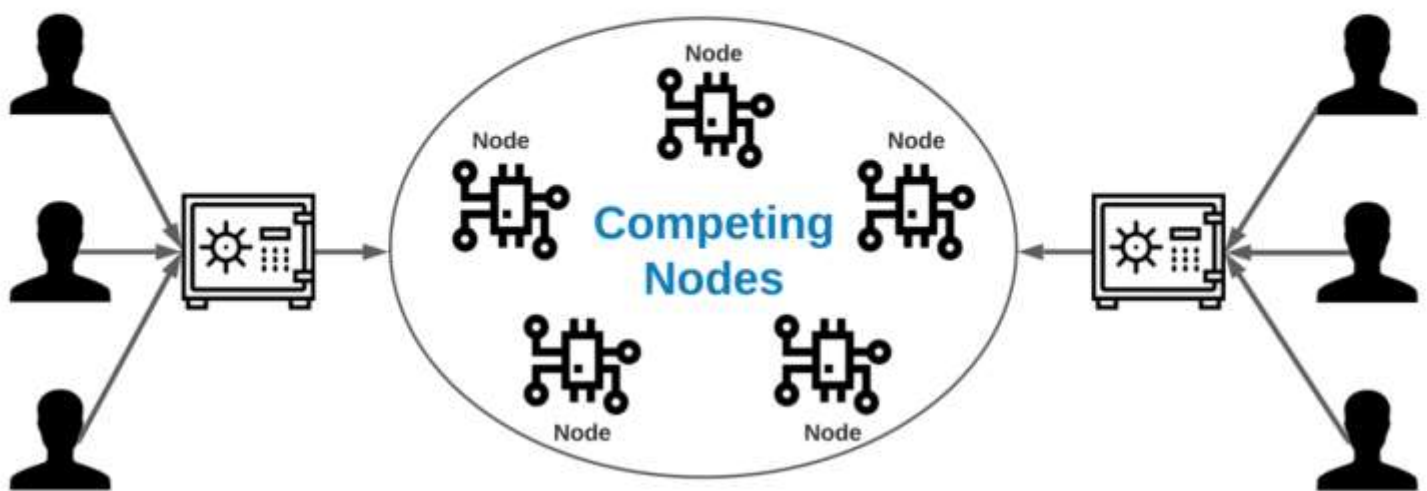

Coin staking gives currency holders some network decision-making power. By staking coins, you gain the ability to vote and earn money. Staking coins is becoming increasingly popular, with many users describing it as "profitable" in the same way that mining is. However, unlike mining, there are no significant overhead or electricity costs.

# Benefits of Staking Coins?

---

Staking crypto coins has several advantages that have contributed to its popularity:

1. It is risk-free. Coin staking is much more resistant to 51 percent attacks because you would need to buy 51 percent of the coins to take over the network, which is economically disadvantageous.
2. It is inexpensive. You do not need to invest in expensive equipment or pay high electricity bills to stake coins. Staking can be done with a standard laptop or a mobile wallet on your smartphone.
3. Staking crypto coins doesn't require any specialised knowledge or skills. All you have to do is purchase coins on an exchange and put them into staking in your wallet. The system computes the reward on its own.
4. Low energy consumption and environmental friendliness. It does not necessitate the purchase of costly equipment or the payment of electricity; it only necessitates a small amount of computing power. Unlike mining, staking uses a lot less electricity.
5. Staking implies asset growth. To make large profits, you should stake more coins. In addition to profit from staking, the coin's value is likely to rise.

# What is Yield Farming?

---

Yield farming is a process that allows cryptocurrency holders to lock up their holdings for a Yield farming is also known as liquidity mining. Essentially, yield farming is a method of generating more cryptocurrency with your existing cryptocurrency. It entails you lending your money to others using the magic of computer programmes known as smart contracts. In exchange for your services, you will be compensated in the form of cryptocurrency.

This innovative and volatile application of decentralised finance (DeFi) has recently skyrocketed in popularity as a result of further innovations such as liquidity mining. Yield farming is currently in the still-nascent DeFi sector. The main functionality of yield farming involves augmenting the liquidity pool of any Defi platform/Project, these projects are essentially a smart contract that holds the added funds.

## In a Nutshell: Yield Farming

- Yield farming generates higher returns than some traditional fixed income options, but it comes with its own set of risks and volatility.
- You can stake or lend your crypto assets in your wallet for a set period of time and be rewarded in the form of the crypto.
- In Yield Farming, lending occurs through the use of Defi protocols with an underlying smart contract.

# What is SMD COIN?

---

SMD COIN is the world's first integrated platform, providing Coins Staking, Yield Farming and Self-Holding. SMD COIN provides customers with decentralized farming services, personalised financial solutions, and a variety of interest models and earning opportunities.

## **Our Mission**

Our company's mission is to provide a user-friendly digital platform where we can provide smart contract, pancake swap. We are the leading staking service provider for blockchain projects. Join our community to help secure networks and earn rewards. We know staking. Our infrastructure was built with maximum security and performance at the forefront.

## **Our Platform**

SMD COIN offers a secured online platform for staking pools and decentralised farming. Maximize your SMD reward by earning the highest rewards in yield farming. The contract is secure as well as non-custodial. SMD COIN's top priority is the security of smart contracts. Consensus Diligence audited the SMD protocol thoroughly and found no serious flaws. Our flexible staking option allows users to earn staking rewards.

# How to Buy SMD COIN?

---

Pancake swap is the best place to buy and sell SMD COIN, but they are also available on pancake swap and will be available on many exchanges very soon. PancakeSwap is a decentralised exchange that allows you to trade cryptocurrencies and tokens without the use of a centralised intermediary while maintaining custody of your tokens. It is based on automated smart contracts that are deployed on Binance Smart Chain, the blockchain platform run by the cryptocurrency exchange Binance.

PancakeSwap uses an automated market maker (AMM) model where users trade against a liquidity pool. Because SMD COIN is a decentralized experiment, we always encourage people to use the decentralised exchange. If you decide to use other decentralized exchanger instead of using pancake, make sure you do your homework first to ensure that it is both safe and secure.

# How it Works

---

You can register on our platform and explore all of the available in a few simple steps. You can make a Meta Mask Wallet. Once you've decided to create a Meta Mask Wallet, you'll be able to buy, sell, send, and receive your coins.

We ensure that participants get most of the benefits. We have a robust community and addressing questions and concerns is easy. Everyone in the community is empowered to help answer questions or concerns on regular a basis.

## **Meta Mask Wallet**

A Meta Mask Wallet is a cryptocurrency wallet that stores and maintains a coin's full ledger in real time. It is a full node computer wallet that provides a number of advanced features and benefits that other cryptocurrency wallets do not. Meta Mask Wallet is technically comprised of a network of virtual private and secure servers, as well as bonded validated systems.

# How it Works

---

Just follow these simple steps:

## **Make a Meta Mask Wallet**

Create a Meta Mask Wallet on a desktop computer or a mobile device running IOS or Android. This method will allow you to buy, sell, send, and receive SMDCOIN.

## **BNB should sent to your wallet**

BNB can be purchased directly on Meta Mask or transferred to your Meta Mask Wallet from exchanges such as Coinbase, Binance, and others. Make sure to use the when transferring BNB.

## **Connect your wallet to Pancake Swap**

Pancake Swap is a service to allows you to connect your wallet to the internet. By clicking 'Connect to a wallet' and selecting Meta Mask, you can connect your wallet to pancake swap.

## **Change your BNB to SMD COIN**

As soon as you have BNB on hand, you can begin swapping! Enter the token address or search for it in the tokens list by pressing "Select a token".

# Our Features

---

## **SMD Economics**

### **Multi Chain Market**

MultiChain is an open-source blockchain platform designed for developing and deploying private blockchain applications that operate within or between organisations. Multi-Chain Markets support Binance Smart Chain, with more Chains to be added in the future.

### **Risk Control Management**

Our expert team has included a number of sophisticated safeguards to prevent the theft of money or information and provide risk control management. Define a set of risk management rules to avoid contract and market failure.

### **Aggregation Earnings**

As a strong hub among DeFi protocols, SMD vault ensures maximum liquidity and maximises aggregation earnings while increasing capital use.

We have everything that you need in one place.

- Buy, swap & hold your coins.
- Using a secure wallet, you can keep your coins safe.
- In seconds, you can swap or trade your coins.

# What is a Trust Wallet?

---

Trust Wallet is a cryptocurrency storage wallet that runs on a decentralised network. It is compatible with mobile devices and allows you to control 100% of your private keys. Furthermore, Trust Wallet allows you to send, receive, and store cryptocurrency assets. You can also access hundreds of dApps using the dApp browser (decentralized applications).

Trust Wallet is also a part of the Binance ecosystem. It is the original wallet Binance DEX mentioned above that allows users to trade cryptocurrencies directly on the platform while maintaining complete control over their assets.

## What coins does the Trust Wallet support?

Thousands of coins/tokens are supported by Trust Wallet. Their multi-currency wallet application works with all ERC20, ERC721 and ERC223 tokens and supports all major Ethereum blockchains. As a Bitcoin wallet, it also provides insurance and can hold multiple currencies. other. Every month, the Trust Wallet development team adds support for new cryptocurrencies, so keep checking back.

# What is Benkcex?

---

BankCEX is a platform for exchanging digital assets. On the platform, users can buy, sell, and exchange cryptocurrencies. It provides market analysis, live exchange rates, cryptocurrency status, trade history, and an order list and history. It accepts Bitcoin, Cardano, Dash, Dogecoin, Ethereum, Golem, Jetcoin, and other cryptocurrencies. The BankCEX Platform is built for novice and professional market participants alike delivered through a seamless front-end experience and customizable interface.

Their mission is to bring opportunity to the masses and to drive universal continuity across society by implementing blockchain technologies. BankCex will charge a trading fee equal to half of the exchange's default fee. Every day, BankCex receives 30% of the revenue for reimbursement. This policy is in effect for BankCex exchange holders from 5000 banks.

# Why Choose Us

---

As we all know, Apple is successful today not only because of the iPhone or iPod, but also because it provides its community with an end-to-end ecosystem. Do you know that Apple iTunes generates more revenue for Apple than product sales? The ability to provide genuine value to the community is the first step toward developing a meaningful business and, as a result, a successful organisation.

A comprehensive platform for cryptocurrency enthusiasts. According to our research, people prefer to consolidate services for simplicity rather than having too many platforms to achieve their goal of growing funds in the world of crypto/digital currency.

SMD COIN is growing in a very consistent manner and like many innovative platforms. We are now all set to offer a unique ecosystem for our valued clients by underpinning all the essential components together. Our platform will be extremely simple to use, with only the necessary options for users and other stakeholders.

# Roadmap
